## REPOPULATION BEGINS FOR AGOURA HILLS AND WESTLAKE VILLAGE RESIDENTS AFFECTED BY WOOLSEY FIRE

**LOS ANGELES (Nov. 11, 2018)**—Los Angeles County Sheriff's Department is announcing the repopulation of the areas of Agoura Hills and Westlake Village (Los Angeles County side) which will begin to occur on Sunday, November 11, 2018 at 9pm. To accomplish this process, the California Highway Patrol will be reopening the Interstate 101 Freeway. At 9pm, the northbound lanes will be open from Valley Circle Boulevard, with the off-ramps at Chesebro Road, Kanan Road, Reyes Adobe Road, and Lindero Canyon re-opening. At 10pm, the southbound lanes of Interstate 101 Freeway will open, with the same off-ramps to southbound traffic.

The only areas in the impacted fire zone of Los Angeles County that we are able to safely repopulate at this time are the Agoura Hills and Westlake Village communities, between Chesebro Road and Westlake Boulevard and north of the 101 Freeway. No access will be available to neighborhoods south of the 101 Freeway. The Los Angeles County Public Works has closed Chesebro Road at the bridge located between Driver Avenue and Balkins Street due to the bridge being damaged during the fire.

The Los Angeles County Sheriff's Department will have a strong presence in the repopulated and evacuated areas for the next several days to ensure the protection of our residents and their property.

All other road closures and evacuated areas remain in effect.

For further information on the evacuation centers, animal shelters, road closures and wildfires, visit [lacounty.gov/woolseyfire](http://lacounty.gov/woolseyfire).

**Media Accessibility for People with Disabilities, and others with Access and Functional Needs.**

Federal Communication Commission rules under Section 255 of the Communications Act require telecommunications service providers to make their products and services accessible to people with disabilities, if such access is readily achievable. Where access is not readily achievable, service providers must make their devices and services compatible with peripheral devices and specialized customer premises equipment that are commonly used by people with disabilities, if such compatibility is readily achievable.
